LINK**

**SMOOTH, SAFE,  
SMARTER TOWING.**

# TOW-PRO LINK

## TOWBAR-MOUNTED ELECTRIC BRAKE CONTROLLER

### ADVANCED TRAILER SWAY RECOVERY

New SwayStop Plus delivers one-touch sway control. Simply press and release the button; the Tow-Pro Link then activates the trailer brakes until the sway incident is resolved, allowing you to keep both hands on the wheel.

### SMOOTH BRAKING PERFORMANCE

The only 6-axis sensor on the market delivers unmatched control and smooth braking.

### STREAMLINED INSTALLATION

With a USB powered remote and Bluetooth phone app, the Tow-Pro Link delivers installations up to 50% faster than other leading brake controllers.

### TWO BRAKING MODES

Everyday Mode (proportional braking) for most on-road towing conditions, and Manual Off-road Mode for more challenging conditions (steep descents, sand, etc.).

The towbar-mounted Tow-Pro Link is the ultimate solution for convenient and safe trailer braking.

Navigate your journeys with confidence thanks to SwayStop Plus™ trailer sway stabilisation, while the class-leading 6-axis sensor ensures smooth braking, precise control, and fast calibration.

Designed to keep vehicle modifications to a minimum, the Tow-Pro Link delivers a streamlined installation experience.

Tow-Pro Link: where streamlined setup meets ultimate towing safety.
